

Information sheet Freeride Thursday

For our Thursday Freeride experience, there are some important points to consider:

- **Requirements:**
 - You should already have some experience in deep snow.
 - The difficulty of the tour is based on the skills of your group and the current snow conditions.
 - For safety reasons, the ability of the weakest participant is given more consideration than that of the strongest participant.
- **Meeting Point:**
 - The exact meeting point varies depending on the planned tour.
 - It may be necessary to purchase additional mountain lift, train, or bus tickets.
- **Pre-tour contact:**
 - Please make sure to contact your guide, before the tour.
 - He/She will discuss all necessary details with you and provide you with the exact meeting point.
 - You can reach the guide, at the following number: +41 77 527 37 02 (Please call in the evenings, as I am skiing during the day).
- **Equipment:**
 - Avalanche transceiver (LVS - Lawinenverschüttetensuchgerät)
 - Shovel
 - Probe
 - Backpack.
 - Skis with touring bindings and climbing skins
 - Or splitboard with climbing skins and telescopic poles
 - Or snowboard with a backpack for attaching the board and snowshoes and telescopic poles

The required equipment can be rented from our partner, Bardillsport, at fair rates.

We look forward to an exciting freeride adventure and are available to answer any further questions. Safety and fun are our top priorities.
